What are the differences between TRACK-HD and Enroll-HD? TRACK-HD is a clinical trial that focuses on the early stages of Parkinson's disease, while Enroll-HD is a larger, more comprehensive study that includes people with more advanced disease. TRACK-HD is designed to help researchers understand the early changes in the brain that lead to Parkinson's disease, while Enroll-HD is designed to help researchers understand the long-term effects of the disease and to test new treatments.

**TRACK-HD, TRACK-HD, TRACK-HD**

TRACK-HD is a clinical trial that focuses on the early stages of Parkinson's disease, while Enroll-HD is a larger, more comprehensive study that includes people with more advanced disease. TRACK-HD is designed to help researchers understand the early changes in the brain that lead to Parkinson's disease, while Enroll-HD is designed to help researchers understand the long-term effects of the disease and to test new treatments.

TRACK-HD is a clinical trial that focuses on the early stages of Parkinson's disease, while Enroll-HD is a larger, more comprehensive study that includes people with more advanced disease. TRACK-HD is designed to help researchers understand the early changes in the brain that lead to Parkinson's disease, while Enroll-HD is designed to help researchers understand the long-term effects of the disease and to test new treatments.

Jeff is a participant in the TRACK-HD study.
